WHAT IT IS PoDoCo?

Maintaining competitiveness and further strengthening it requires constant monitoring and analysing of new technological and operational trends. Research and development activities in companies focus on challenges and opportunities which already are visible and there is lack of time or capabilities to look beyond the strategic horizon of the company. The strategic renewal of companies needs new talented people and new foresight into rising and emerging phenomena. In order to understand the new phenomena and benefit from them, companies need scientific work carried out by practically oriented post docs, who are familiar with scientific analysis and synthesis methods.

Post Docs in Companies, PoDoCo, is a matchmaking program supporting long term competitiveness and strategic renewal of companies and employment of young doctors in the private sector. The duration of PoDoCo period is 1-2 years and it consist of two phases: research period and targeted research period. PoDoCo foundation pool offers research grants for the research period. After the research period the company hires the Post doc to deepen the research results and to create company specific insight. The result is a win-win situation where academic research is supporting the long term competitiveness and strategic renewal of Finnish companies and young doctors get industrial experience.

TO WHOM IT IS?

- Post docs who have recently completed or will soon complete their doctoral degree and are interested in a career in industry.
- Companies with desire to search opportunities lying beyond the current strategic horizon of the company.
