Welcome to teaching demonstration!

Overall assessment of teaching skills

The Teaching Skills Committee will evaluate your teaching qualifications comprehensively using the following criteria:

- Pedagogical training and thinking
- Teaching experience and development of teaching
- Thesis and dissertation supervision experience
- Ability to produce learning material
- Other teaching merits
- Demonstration of teaching skills

Preparing for the teaching demonstration

Please send a topic for your teaching demonstration in advance according to the instructions you will receive separately. You are kindly requested to include a teaching plan for the course or module to which your demonstration of teaching skills belongs. The teaching plan will be distributed to committee members. The teaching demonstration is a sample of a course or module that you have chosen (lecture series, etc.). The teaching plan is the document that outlines the whole course or module including its intended learning outcomes and syllabus. Before the demonstration, you will be requested to refer to the teaching plan and to describe how the teaching sample that you have chosen fits into the course or the module.

The demonstration of teaching skills is a teaching situation relevant to the position in question, and it may take the form of a lecture, seminar supervision, other event, or a combination of the above. Handing out assignments for a course or a similar session with no scientific teaching content is, however, unacceptable. A teaching demonstration should not be an expert lecture intended for professionals. The target group for the demonstration is students pursuing intermediate studies at the Bachelor of Laws level, unless you have agreed otherwise with the chair of the committee. The teaching situation should be realised in a way that corresponds with your view of excellence in teaching. You may give your demonstration in English.

The committee pays particular attention to the following aspects in its assessment of your teaching skills:

1. Learning outcomes, target group and context

- Definition of learning outcomes
- Consideration and definition of target group and context
- Achievement of the learning outcomes in the demonstration according to the principles of constructive alignment
- Summary of the teaching situation

2. Teaching content

- Correspondence between the topic and content of the demonstration
- Scientific orientation and topicality of the content
- Critical thinking and effective argumentation
- Connection between theory and practice
- Suitability and diversity of the research-based information used
- Consideration of the target group when making choices related to content

3. Teaching methods and aids

- Organisation of the teaching situation with consideration given to the learning outcomes, content, target group and context
- Motivation of the target group
- Appropriate use of various teaching methods
- Appropriate use of teaching aids and material, including the utilisation of digital teaching technology

4. Assessment of learning

- Assessment of learning in alignment with the set learning outcomes (in the teaching situation or the lecture plan)
- Consideration of the target group in solutions related to assessment (in the teaching situation or the lecture plan)

5. Interaction and time management

- Vocal control, clarity and intelligibility of speech
- Coherence of oral and written communication
- Quality of interaction
- Time management
- Other matters improving communication

Please see the attached matrix for more detailed criteria.

On the whole, the teaching demonstration will take approximately one hour including a presentation of the teaching plan (a few minutes), the teaching demonstration itself (max 20 minutes), and an interview with the committee (15 minutes). The Chair of the Teaching Skills Committee is Professor Panu Minkkinen.

A computer and a data projector are available in the room.

In addition, as a basis for your assessment report, please complete the following form.

Please note that the maximum number of characters in every response box is 3000. As an aid you can use the teaching portfolio you provided earlier.

22 May 2017/Academic

September 2018/Specified in cooperation with the senior lecturers in university pedagogy at the City Centre Campus and chairs of teaching skills committees, except for the Faculty of Educational Sciences, which employs the Academic Affairs Council's assessment matrix

Assessment of teaching skills

At the University of Helsinki, teaching skills are assessed when recruiting teaching and research staff, as well as when applying for the title of docent. Teaching skills are assessed as a whole, taking into account pedagogical training and thinking, teaching experience and the development of teaching, experience in thesis and dissertation supervision, the ability to produce learning material, other teaching merits and a demonstration of teaching skills. A five-step scale, in which the grade of Good represents the intermediate level (Regulations on Degrees and the Protection of Students' Rights, section 37), will be used for the assessment. The assessment of teaching skills is governed by the Regulations of the University of Helsinki.

The requirements of each assessment area are described in the assessment matrix. Each area of assessment must be graded in accordance with the matrix. The overall grade for teaching skills is not necessarily the mathematical average of the assessed areas; rather, different areas may compensate for each other or be emphasised to varying degrees in relation to the position in question and its requirements.

A separate assessment matrix has been drafted for the teaching demonstration. The overall grade for a demonstration of teaching skills is not necessarily the mathematical average of the assessed areas; rather, different areas may compensate for each other. The grade given for a teaching demonstration constitutes a part of the overall assessment of teaching skills.

As specified in the Regulations of the University of Helsinki, the minimum requirements for teaching skills vary between positions. This must be taken into consideration when assessing teaching skills and their sufficiency in relation to the position to be filled.

ASSESSMENT MATRIX FOR TEACHING SKILLS

Assessment	Passable	Satisfactory	Good	Very good	Excellent
Areas of assessment for teaching skills					
1. Pedagogical training and thinking	- Little or no description of personal pedagogical thinking	- Meagre description of pedagogical thinking	- Justified description of pedagogical thinking that demonstrates an	- Clear and justified description of pedagogical thinking, demonstrating an	- Analytical and justified description of pedagogical thinking, demonstrating an

ASSESSMENT MATRIX FOR THE TEACHING DEMONSTRATION

The assessment of a teaching demonstration is based on the idea of constructively aligned teaching, where intended learning outcomes, content, teaching methods and assessment are in alignment. The goal is to support an active and independent knowledge construction and learning process for students (Biggs & Tang: Teaching for Quality Learning at University).

Assessment Components of the demonstration of teaching skills	Passable	Satisfactory	Good	Very good	Excellent
1. Learning outcomes, target group and context - Definition of learning outcomes	- No definition of learning outcomes, or the definition is inadequate	The assessment components are partly achieved	- Learning outcomes are defined	The assessment components are very well achieved	- Learning outcomes are defined in a well- functioning and student- oriented manner
- Consideration and definition of target group and context	- No definition/consideration of target group and context, or the definition/consideration is inadequate		- The content, target group and context of teaching are taken into consideration when defining the learning outcomes		- The definition of learning outcomes takes content, target group and context very well into consideration
 Achievement of the learning outcomes in the demonstration according to the principles of constructive alignment Summary of the teaching situation 	 Learning outcomes are not achieved according to the principles of constructive alignment, or their achievement is inadequate No summary, or the summary is inadequate 		 Learning outcomes are achieved in the demonstration according to the principles of constructive alignment The teaching situation is summarised in alignment with the set learning outcomes 		 Learning outcomes are very well achieved in the demonstration in accordance with the principles of constructive alignment The summary of the teaching situation is excellent and in alignment with the set learning outcomes

Assessment	Passable	Satisfactory	Good	Very good	Excellent
Components of the demonstration of teaching skills					
 2. Teaching content - Correspondence between the topic and content of the 	- The topic of the demonstration does not correspond with its content, or their	The assessment components are partly achieved	- The topic and content of the demonstration correspond with each other	The assessment components are very well achieved	- The topic and content of the demonstration correspond very well with each other according to the
demonstration	correspondence is inadequate				principles of constructive alignment
- Scientific orientation and topicality of the content	- There is no research- based topicality in the content or it is inadequate		- The content is research- based and topical		- The content is research- based and very topical
- Criticality and effective argumentation	- The content is not critically examined, nor are there any related arguments, or both are inadequate				- The content is critically examined and argued
			- The connection between		- The connection between
- Connection between theory and practice	- There is no connection between theory and practice, or it is inadequately described		theory and practice is explained		theory and practice is very well explained
- Suitability and diversity of research-based information used	- There is no research- based information used, or it relates to the topic inadequately		- The research-based information is relevant and appropriate for the topic, as well as based on personal research in terms of the set topic		- The research-based information is appropriate for the topic and very diverse
- Consideration of the target group when making choices related to content	- The target group is not taken into consideration when making choices related to content, or the consideration is inadequate		- The target group is taken into consideration when making choices related to content		- The content of the demonstration supports very well student learning in the target group

Assessment Components of the demonstration of teaching skills	Passable	Satisfactory	Good	Very good	Excellent
 3. Teaching methods and aids - Organisation of the teaching situation with consideration given to the learning outcomes, content, target group and context 	- The teaching situation is not appropriately organised, or the organisation is inadequate in terms of the learning outcomes and content	The assessment components are partly achieved	- The teaching situation has been appropriately organised, with consideration given to the learning outcomes, content, target group and context	The assessment components are very well achieved	- The teaching situation has been constructively and appropriately organised, with consideration given to the learning outcomes, content, target group and context
 Motivation of the target group Appropriate use of various 	 The target group is not supported in taking part in the learning situation, or the support is inadequate The use of teaching 		 The target group is supported in taking part in the learning situation in an appropriate manner Teaching methods are 		- The target group is motivated to follow the teaching situation, to show interest in the topic and to participate
teaching methods	methods is clearly inappropriate in terms of their suitability to the situation and content		used in a manner appropriate to the teaching situation, target group and content		- The teaching methods support students in their learning process
- Appropriate use of teaching aids and material, including the utilisation of digital teaching technology	- The use of teaching aids and material is clearly inappropriate in terms of the situation and content		- Teaching aids and material are used in a manner appropriate to the teaching situation, target group and content		- Teaching aids and material are used in a manner appropriate to and in alignment with the teaching situation, target group and content
4. Assessment of learning - Assessment of learning in alignment with the set learning outcomes (in the teaching situation or the lecture plan)	 No assessment of learning is carried out, or is carried out inadequately in light of the set learning outcomes The target group is not 	The assessment components are partly achieved	- The assessment of learning is in alignment with the set learning outcomes	The assessment components are very well achieved	- The assessment of learning is in alignment with the set learning outcomes and content, while appropriately supporting the students' learning process
- Consideration of the target group in solutions related to	given consideration, or is inadequately considered in		- The assessment of learning is carried out in a		- The assessment of learning is diverse and

Assessment	Passable	Satisfactory	Good	Very good	Excellent
Components of the demonstration of teaching skills					
assessment (in the teaching situation or the lecture plan)	solutions related to assessment		manner appropriate for the target group		transparent, encompassing the entire learning process
 5. Interaction and time management - Vocal control, clarity and 	- Inarticulate and unintelligible speech, with deficient vocal control	The assessment components are partly achieved	- Vocal control and speech are clear and intelligible, supporting each other	The assessment components are very well achieved	- Vocal control and speech are clear and intelligible, supporting each other very well
intelligibility of speech					
- Coherence of oral and written communication	- Oral and written communication are not in alignment, or their alignment is inadequate		- Oral and written communication are in alignment		- Oral, written and visual communication are in alignment, supporting each other
 Quality of interaction Time management	- No interaction, or interaction is inadequate		- Interaction is appropriate for the demonstration of teaching skills		- Interaction supports students' learning process
- Other matters improving communication	- Unsuccessful time management		- The time limit of the session is not exceeded		- Time management is pedagogically sound
