PAYMENT

We no longer accept card details by post. You can pay by cheque (payable to OUDCE) or by going online - see below.

ENROL ONLINE by adding the course code O18P141AHJ to the end of the URL for the Department's website: www.conted.ox.ac.uk/O18P141AHJ

If paying by cheque, please send this form with your payment to the

Day and Weekend Programme Office OUDCE, Rewley House, 1 Wellington Square, Oxford, OX1 2JA. Email: ppdayweek@conted.ox.ac.uk Telephone 01865 270380

CONCESSIONARY FEES for day and weekand events are now available for people on low incomes. If you are in receipt of a state benefit or your sole source of income is a DWP State Retirement Pension and Pension Credit you may be eligible for a reduction of 50% of tuition fees. For conditions and an application form go to https://www.conted.ox.ac. uk/about/concessionary-fees-for-short-courses

CANCELLATIONS AND REFUNDS

Fees will only be refunded in exceptional circumstances and all refunds will be subject to a £20 administration charge.

Refund requests should be made, in writing, to the Manager of Public Programmes, OUDCE, 1 Wellington Square, Oxford, CIK1 2JA, or by emailin ppdayweek@conted.os.ac.uk

The Department reserves the right to cancel courses with insufficient enrolments and the decision to do so is usually made 2 weeks before a course is scheduled to run. In such cases students are refunded in full. The Department cannot be held responsible for accommodation or travel booked in advance.

METAL DETECTING FOR ARCHAEOLOGICAL PROJECTS: AN INTRODUCTION OrliPupAHJ

Metal Detecting for Archaeological Projects: An Introduction

A day school to be held at Rewley House, 1 Wellington Square Oxford

Of interest to the detectorist and archaeologist this course looks to explore how the metal detector and detectorist practitioner, can become an important element in the processes of archaeological mitigation. We will evaluate how 'stratigraphy' and 'context' relates the 'Code of Practice' through to an understanding of archaeological investigation and recording in the planning process. We look at typical documents such as method statements and the Written Scheme of Investigation, to what will be required and expected of the detectorist when on site and further preparation and reporting for pre and post site attendance. This introductory course will cover specific survey methodologies such as PDAS: Partial and Detailed Artefact Surveys and will be the precursor to further courses that focus on the embedding of metal detector use into professional practice.

With the intention of becoming a Research and Educational Institute, the Association of Detectorists have been establishing the body over 18 months with overwhelming support from anchaeological and heritage bodies and institutes. Our aim and mission is in developing a nationwide educational program based on archaeological and conservational principles, we look to encourage detectorists whose motivations are based in the research and preservation our National Heritage. With courses to enhance the 'hobbylats' awareness of 'contestual landscape to the highest level of 'consultant practitioner', which focuse on embedding metal detecting into professional practice and reating a UK 'Bank' of consultant detectorists, to assist on archaeological projects. CITA Chartered Institute for Archaeologists Certificate of attendance This is to acknowledge that XXXXX XXXXXXXXXXX attended a CIfA training course entitled Metal Detecting for Archaeological Projects: an introduction The course was organised and run by The Association of Detectorists & OUDCE on 24 November 2018 Attendance at this course, if relevant to your professional development aims, counts as 5 hours of CPD Congratulations on completing the course venor Keith Westcott Hinton, CITA Chief Executive ver Steele Building, Wessex Hall, Whitekni ey, Reading RG6 6DE

ALGAO is keen to support your initiatives. We see the proposed training courses as a way of embedding metal detector use into professional practice. It will be particularly important to include clear understanding of archaeological evaluation and mitigation recording in the planning process, and to ensure that detectorists working in these projects work to a clearly defined specification, such as you have outlined, to support the aims of the project. ALGAO can certainly help with support and guidance on this aspect, spread awareness of the training, and encourage the use of standard specifications among our members.
