#### Why Come Here?

Freie Universität Berlin was established in West Berlin in 1948 with significant international support. Since its inception, the principles of freedom and international collaboration have been crucial in shaping its trajectory. FU Berlin stands as one of the few German universities that have succeeded in all three funding lines of the German federal and state Excellence Initiative. This achievement has brought additional resources to support its ongoing institutional growth. FU Berlin is an active partner in the Berlin University Alliance, a collaboration among four distinguished Higher Education Institutions in the city. This alliance aims to consolidate strengths and create an optimal environment for research and teaching throughout the German capital. In terms of international recognition, FU Berlin holds a prominent position. According to the ranking by the Alexander von Humboldt Foundation, it is the top-ranked institution in Germany for attracting international scholars.

#### Who Should I Contact?

The first step is to search for professors or groups you would want to work with and contact them, if you haven't already. They will be able to help you develop your ideas, and put you in touch with support staff to help you further.
