

Data Support  
University of Helsinki

**Support for research data  
management at the University  
of Helsinki**

# RESEARCH DATA MANAGEMENT

- The Data Support at the UH assists with research data management: data protection, storage, sharing, documentation...
- Data Support connects you with data management experts from the Helsinki University Library, IT Services, Research Affairs and Legal Affairs.
- You can discuss your research data management with Data Support at any stage of your project.
- When in doubt, you can request a personal meeting with a Data Support expert.
- Contact: [datasupport@helsinki.fi](mailto:datasupport@helsinki.fi)

# DATA MANAGEMENT PLAN

- Use **DMPTuuli** to write your data management plan: <https://www.dmptuuli.fi/>.
- Data Support suggests using the General Finnish DMP template unless your funder provides other instructions.
- According to the University of Helsinki practices, Data Support reviews data management plans before submission to funders.
- Submit your data management plan for review at least one month before the deadline, along with your research plan. Data Support may request revisions if necessary.

- More information on research data management:
