Tomi P. Mäkelä, MD PhD

Founding Director, Helsinki Institute of Life Science HiLIFE

Professor Tomi P. Mäkelä is Founding Director of Helsinki Institute of Life Science HiLIFE at the University of Helsinki. Initiated in 2017, HiLIFE integrates strengths in life science on university campuses to enhance high quality research and facilitate national and international partnerships in areas of research, infrastructures, and innovations. Mäkelä was the driver of the establishment since the original concept in summer 2014.

Mäkelä is a Professor of Biochemistry and Molecular Biology, and has served as Director of the Institute of Biotechnology, as Vice Dean for Research of the Faculty of Medicine, and as Director and Dean of the Helsinki Biomedical Graduate School at the University of Helsinki. He is Vice Director of the Center of Excellence in Translational Cancer Biology. Mäkelä acts as panel chair at ERC, and as board member of Biocenter Finland and Finnish Academy of Science and Letters.

Mäkelä is scientifically recognized for his work on cell growth signaling and its deregulation in cancer, and especially on the tumor suppressor kinase LKB1. He has 129 publications, 11 100 citations and an H-index of 51. He is an EMBO Member, and has been recognized by the Anders Jahre prize for young investigators.

Mäkelä has also been active in improving conditions for high quality research and developing careers at the University of Helsinki and in Finland:

- A key figure in establishing quality based funding on publications in Finland since 2012 as chair of the JURE working group. This changed the incentive from high quantity to high quality in publications and is changing attitudes rapidly.
- An early proponent of tenure tracks for research positions in Finland and at the University of Helsinki, where the majority of Principal Investigator level appointments (lecturers, professors) are to permanent positions without subsequent evaluations.
- A driver in developing the University of Helsinki as an international environment from recruitments to international Masters programs to introducing English as an administrative language
